

# The 4 Most Common Uses of Eco-Friendly SuperSheets

REPSCO's SuperSheets - the 100% recycled plastic slip sheet - has many uses. We'll cover the 4 most common uses and the significant benefits.

## Replace the pallet

Replace heavy, failing pallets with 100% recycled plastic slip sheets.

87% less cost, 97% less weight, 99% less space. No hauling back and forth, no pests, no mold no pallet-based injuries.

## On top of the pallet

If you must use pallets, fortify with SuperSheet for 70% more stability, 92% more portability and up to 98% more sterility.

Wood absorbs moisture and lots of bad things. SuperSheets help. A lot.

## Within the Load

Stabilize the layers of product within each load.

Prevent damage within your loads by placing a SuperSheet between the layers. Up to 100% elimination of damage within a load.

## Between Pallets/Loads

Freight maximizer, these sheets allow for safely stacking between loads, so you get more cargo out for every shipping \$. Not only that, it stabilizes those large shipments and your product will arrive alive and as intended.

No matter your usage, SuperSheets provide unmatched cost savings. Replace costly alternate options, preventing damage to products, reducing worker injuries and save on space and weight:

Note the common themes across all SuperSheet uses:

- Costs 87% less, on average, than a wooden pallet
- Costs less than weaker, paper fiber sheets with 100% superior edge integrity
- Weighs 97% less than pallets while taking 99% less space
- Stores at point-of-use so eliminates back and forth retrieval
- Eliminates wooden pallet-based injuries (insurance costs, too)

Save the planet, reduce the harvesting of trees and the landfilling of plastic waste.
